Introduction

Your Trusted Path to a Tech Career

We are committed to making tech careers accessible to everyone. Over the years, we've built a reputation for delivering top-quality education by partnering with students, enterprises, further education colleges, and awarding organisations. Our collaborations with government agencies ensure that we meet the highest standards of education, giving you the confidence that you're learning from one of Europe's largest and most trusted technical skills educators.

External Validation You Can Trust: Our programs are recognised and approved by government institutions, ensuring rigorous external audits and oversight. This validation guarantees that our programs consistently meet industry-leading standards, providing you with a credible and reliable pathway to success in the tech industry. When you choose us, you're choosing an education provider that's not only backed by industry leaders but also meets the strictest criteria for educational excellence.

Why learn with Code Institute

Software developers are in high demand and among the highest-paid professionals globally. Joining this field will propel you forward, ensure relevancy, and increase earning potential.

Our university credit-rated programme sets the global standard for software developers, trusted by employers and governments. Throughout your journey, we provide sought-after coding skills, exceptional learning support, and a dedicated career services team focused on helping you secure employment. In the ever-evolving landscape of an AI-driven future workforce, mastering skills like Python becomes essential for staying ahead and thriving in this dynamic field. 98% of our career service users find employment within a year of graduation, with 28% receiving job offers before graduation.

Code Institute equips you with the skills and certification needed to stay relevant, get ahead, and land your dream job.

No coding experience needed.
Suitable for beginners and intermediates.

Only university credit-rated
online coding bootcamp in
Europe and the UK.

98% of grads **are employed** 12 months or less.

Our programs meet the highest education standards

Europe's only credit rated
software development bootcamp

Careers Support

Launch your career in Software Development

At Code Institute, we believe career success in software development is about more than just theory—it's about gaining real, hands-on experience that prepares you for the challenges of the workforce. That's why we've partnered with over 2,000 leading employers in the tech industry to connect you with top opportunities, ensuring you're applying your skills in real-world scenarios. Through practical, project-based learning, you'll not only grasp essential coding concepts but also develop the expertise that employers are actively seeking.

Why hands-on experience matters

Our curriculum is focused on providing you with practical, job-ready skills through collaborative projects and hackathons, allowing you to build a strong portfolio to showcase your coding expertise at your next interview. You'll work on real-world business challenges, whether you're addressing industry problems or applying your knowledge directly to your current role. This hands-on approach ensures that your learning is immediately relevant, so you can hit the ground running from day one.

A tailored career journey

We support your career growth at every stage of the program. At You'll participate in career sessions focused on resume building, cover letters, interview preparation, and career strategy. Additionally, our Careers Hub offers personalised consultations to provide tailored advice whenever you need it.

Comprehensive careers support

Our careers support goes beyond job listings. With over 2,000 trusted hiring partners, we're dedicated to helping you land your dream role. Weekly workshops will help you refine your personal brand and learn how to present yourself effectively.

The tech industry needs you:

While some large social media companies reduced non-coding staff last year, the demand for software developers remains high across industries. Developers are highly sought after worldwide, and we're here to connect you with the best opportunities.

Your exciting new career in software development starts here, and we'll be with you every step of the way!

Maeve Hughes • 2nd
AVP at The Citco Group Limited
2mo •

Delighted to have received my diploma in Software Development from [Code Institute](#). To think only a year ago I had never even written a line of code to now being able to build a fully functioning e-commerce website. Big thank you to the tutors and mentors in [Code Institute](#).

Thoroughly enjoying my new role on the interface solutions team in CFS where I get to put my coding that I've learnt into practice.

Tom Ainsworth • 2nd
Software Developer at Commodities Engineering
1w • Edited •

Finished my first day at [Commodities Engineering](#) today! The team are super welcoming and helpful, and I managed not to break the site, so I'm classing it as a win!

I received my diploma from [Code Institute](#) too, and I'm really happy to have achieved a Merit 😊 It's still a bit strange to think that this time last year I was fumbling my way through html and css on my first project, and now I can't imagine not thinking about/writing code. Can't wait to see what the next 12 months brings.

Callan Maguire • 2nd
Code Institute Full Stack Software Development Graduate
2w •

Rebecca Rayner • 2nd
QA/Technical Services Engineer
3mo • Edited •

It's official, I have my diploma in hand and a very nice Merit grade. I'm now looking forward to starting my new role as a QA/Technical Services Engineer with [Codepak Solutions](#) on the 8th of July.

I am so incredibly thankful to everyone in [Code Institute](#) for all their help and support, I wouldn't be where I am today without it. Onwards and Upwards!

Who is the course for?

We'll guide you to unlock your full potential

This course is designed for individuals of all backgrounds who are looking to overcome unemployment, transition into a new career, or enhance their skills in their current job. Regardless of your coding experience, we will guide you towards unlocking your full potential and preparing you for an AI-driven future in just 10-12 months. All you need is a curious mind, self-confidence, and a determination to succeed. By enrolling in this course, you will acquire the knowledge and skills that are highly sought after in today's job market.

No coding experience required

18 years+, our student base is a vibrant and diverse community of individuals from various age groups and backgrounds.

English proficiency is required

Flexible learning, work and study at the same time.

77%

of Code Institute students are in full-time jobs while doing the programme.

What will I learn?

We're empowering you to quickly transition into new careers

Code Institute's programme is specifically designed to empower individuals to quickly transition into new careers by teaching them the most sought-after coding skills. What distinguishes us from other Full-Stack courses is our comprehensive curriculum, which includes JavaScript, Python, Agile, Design Thinking, and a choice of specialist skill paths. In the rapidly evolving landscape of an AI-driven future workforce, mastering skills like Python is crucial for staying ahead and thriving in the tech industry. By enrolling in our programme, you will not only gain the necessary skills to succeed in your new coding role, but also gain a competitive advantage in your career transition.

Advance your career faster with valuable skills

Whether you are looking to enhance your existing skills or embarking on your first ever third-level course, graduating from Code Institute will give you a significant advantage in the job market. Our specialist skill pathways are designed to accelerate your professional growth and development making you more attractive to employers. You can choose from three in-demand options:

e-Commerce

Advanced Front-End with React JS

Predictive Analytics & AI

Course delivery and commitment

You have the freedom to tailor your own study schedule

Immerse yourself in our cutting-edge Learning Management System (LMS) and embrace the flexibility of online learning with round-the-clock access. Our dedicated support teams, including Student Care, Mentors, Tutors, Career Services, and Community, will support you every step of the way.

With a 12-month timeframe and a minimum commitment of 12-15 hours per week, you have the freedom to tailor your own study schedule. As long as you meet the five portfolio project deadlines spread throughout the programme.

Our course is built on four fundamental components that will empower you to develop your skills and elevate your professional attributes:

Coding Essentials

Unlock your coding potential and master the most in-demand programming languages.

Full-Stack Toolkit

You'll get the skills to blend into existing development teams and make a valuable impact.

Specialised Skill Paths

Students choose one Specialist Skill Path Module for their final project on the course.

Career Support

Elevate your earning potential and boost your confidence to new heights.

Get the qualifications and expertise tech employers seek with flexible online learning

No coding experience

The course lasts for 10-12 months from your official start date. You'll receive a scheduling tool to customise your preferred schedule and commit to a minimum of 12-15 hours of study per week.

We use custom-built analytics software to track and monitor your progress, tailoring our support to help you maintain momentum.

Get ahead with your portfolio

Your portfolio acts as a tangible showcase of your exceptional skills and abilities. Throughout the programme, you will have the opportunity to create five impressive portfolio projects, giving you a competitive advantage during interviews. Additionally, our dedicated careers team will provide support in preparing and arranging interviews with our extensive network of hiring partners.

Internationally recognised qualification

Code Institute is the only online Coding Bootcamp in the UK & Europe with a University Credit-Rating.

Our students' impressive success speaks for itself, with a 98% employment rate within one year of graduation. In fact, 28% are even hired before graduating, highlighting the value and recognition of our programme.

Testimonials

Maya Tudor

Global Apprenticeships Specialist

Google

"Code Institute has been supporting our apprenticeship programs to develop new coders and have been a great partner and a particularly good source of a more diverse technical talent pool."

Alicja Malinowska

Software Apprentice

Code Institute Graduate

Google

"I recommend this course to everyone who would like to make their first step towards a career in programming. My background is psychology, and I had nothing to do with coding, or anything technical for that matter, before I started the Full-Stack Software Developer course part-time in August 2019. In April 2020, I was offered a 2-year apprenticeship at one of the tech giants I knew about this opportunity from Jane, the Director of Employer Engagement at Code Institute. If it was not for her, I probably would not feel confident enough to even apply."

Liga Baikova

Software Apprentice

Code Institute Graduate

adyen

"I recently moved to the Netherlands for the job that I got less than three weeks ago as a technical support engineer for Adyen. The course has so much career support. I went to all of the webinars, and they were so helpful – that's where I met my current employers. I would recommend Code Institute's course – it's exactly what I wanted and needed."

Oliver Perry

Associate Director

SODA

"Our team is constantly looking for Full-Stack Developers with a knowledge of e-Commerce, Advanced Front-End, and Predictive Analytics. These are seriously in-demand skills right now. Employers are crying out for these skills. Code Institute's curriculum is the most advanced we've seen – giving their students not only the tools to change their career but also to excel and progress quickly in their chosen field."

Testimonials

Paul

Software Engineering Apprentice Code Institute Graduate

Google

"Nothing would ever make me prouder of myself for putting in the work every day, and how far I have come since I started this diploma last September. Thank you to Code Institute for their fantastic course, the mentors, tutors, community and all staff involved."

Shubham

Code Institute Graduate 2023

"When I started this course, so many people asked me, 'Why are you doing it now? Because AI is coming, you have ChatGPT, and everything is perfect. You don't need coders'. But to be truthful, if there are no coders, there's no ChatGPT. The basic for each and every job is what is being taught in the Code Institute, which is amazing."

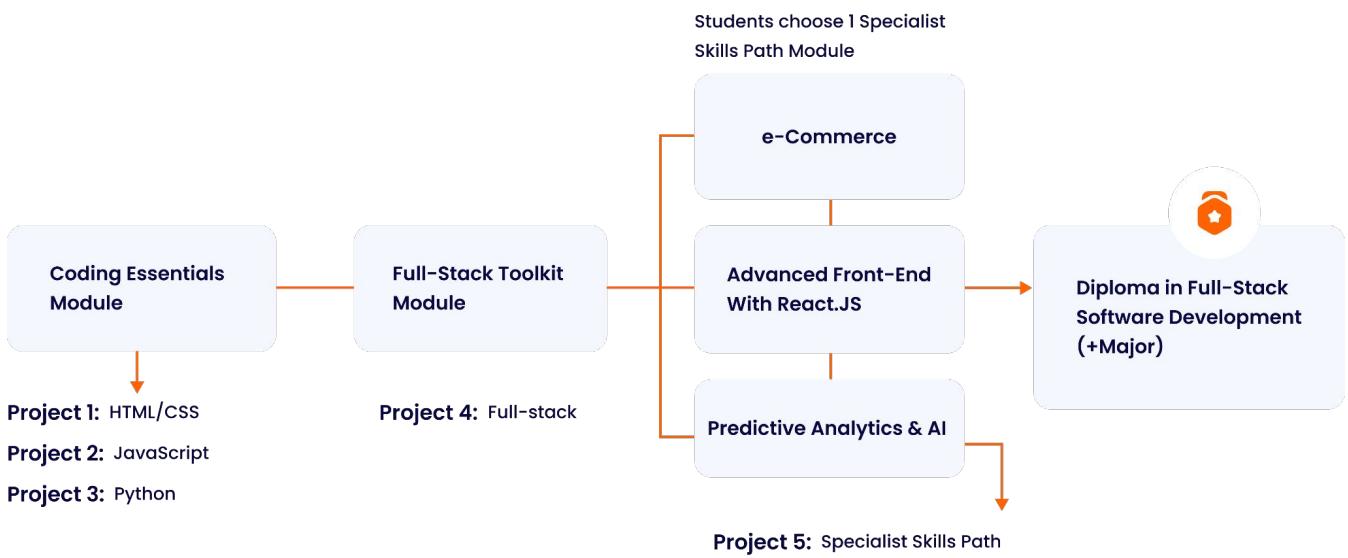

Ulrike

Code Institute Graduate 2023

"I'm still a little bit new to the whole world of machine learning and AI, and the Predictive Analytics specialism, as well as the foundations and machine learning, Python, and so on. All those important technologies, it's a really good foundation. It's a starting point."

Course Overview

Supported by Career Support Team + Student Care Team + 1:1 Mentors + 1:1 Tutors + Community Team

Meet our team

Brian O'Grady
Programme Director

Brian has a passion for modern technology at both a technical and human level. As Programme Director, he brings close to twenty years of industry and educational experience to the Code Institute programmes.

Matt Rudge
Senior Product Developer

Matt is our Senior Product Developer. He has over thirty years experience as a software developer, educator and public speaker. He is passionate about helping students to become job-ready developers.

Jane Gormley
Employment Director

Jane is our Director of Employer Engagement and is tasked with establishing exciting career paths for our graduates all over the world. From start-ups to multinationals, our graduates are placed in diverse roles internationally.

James Stone
Student Care Team Lead

James is our Student Care team lead. He and his team are the friendly voices at the other end of the phone, helping all of our students achieve their goals to become developers. They'll keep you motivated, moving forward, and help answer any questions you may have about the course.

Kenan Wright
Community Engagement

Kenan is our Community Manager and is focused on accelerating the success of student and alumni communities through purpose-driven engagement, content and events.

Irene Neville
Mentoring Lead

As the Mentoring lead, Irene is focused on your learning success. This begins by matching you with one of our mentors, who are industry professionals with years of experience building full-stack software. We have a team of 37 mentors with a wealth of experience in companies like; Cisco, BNP Paribas, Amazon, Intel and more.

Coding Essentials Module Overview

The Essentials modules are designed to unlock your coding potential and empower you to master the most in-demand programming languages and techniques necessary for a successful coding career.

- ▶ You will gain proficiency in the three most sought-after scripting and programming languages: HTML/CSS, JavaScript, and Python.
- ▶ You will delve into the fascinating world of User Experience (UX) and discover the art of crafting user interfaces that captivate and delight users.

What will I learn?

HTML/CSS Essentials

HTML and CSS are essential for creating visually stunning and responsive user interfaces, forming the foundation of web and mobile front-end development.

Javascript Essentials

JavaScript brings web pages to life, enabling interactive elements that captivate users from dynamic autocompletes, to engaging audio and video experiences.

Python Essentials

Python is a powerful language with diverse applications in development, AI, data analytics, machine learning, and robotics, making it the language of AI and one of the most sought-after languages.

Github

Acquire a deep knowledge of the development environment to effortlessly store and organise code, guaranteeing smooth collaboration and effective project management.

UX Essentials

Learn industry best practices to create exceptional user experiences (UX) for web, desktop, and mobile platforms that leave a lasting impression on users.

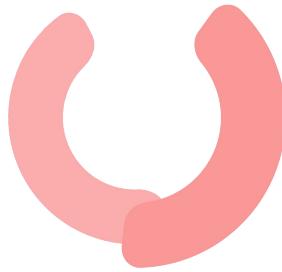

Learning Outcomes

Upon completion of the Coding Essentials module, you will possess the expertise and knowledge to code proficiently in the most highly sought-after programming languages. Additionally, you will have successfully finished three projects that showcase your newly acquired skills, allowing you to impress potential employers with your abilities.

Europe's only credit rate
software development bootcamp

Coding Essentials Module Overview

Get ready to excel in the real-world work environment with our Full-Stack Toolkit. This comprehensive toolkit will transform you into the exceptional graduate that employers seek. You'll have the skills to blend into existing development teams and make a valuable impact.

- You will gain proficiency in the three most sought-after scripting and programming languages: **HTML/CSS, JavaScript, and Python**.
- You will delve into the fascinating world of **User Experience (ux)** and discover the art of crafting user interfaces that captivate and delight users.

What will I learn?

Design thinking

Harness the power of Design Thinking, a dynamic technique for unlocking creative problem-solving. Employed to craft exceptional products tailored to the needs of end-users.

Advanced Javascript

Unlock the power of JavaScript to write efficient and powerful code that takes your projects to the next level. Supercharge your development with our jQuery module and create cutting-edge web applications.

APIs and frameworks

APIs facilitate seamless communication between programs, while frameworks simplify the process of building remarkable things.

Rapid coding with Django

Acquire a deep knowledge of the development environment to effortlessly store and organise code, guaranteeing smooth collaboration and effective project management.

Agile development

Learn industry best practices to create exceptional user experiences (UX) for web, desktop, and mobile platforms that leave a lasting impression on users.

Building with bootstrap

Learn industry best practices to create exceptional user experiences (UX) for web, desktop, and mobile platforms that leave a lasting impression on users.

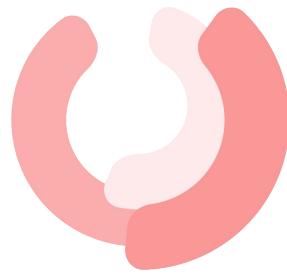

Learning Outcomes

By completing the Full-Stack Toolkit module, you will gain the **essential skills and confidence to seamlessly join any Agile development team**. Your extensive expertise with leading frameworks and tools will make you highly desirable to employers.

Efficiently testing your code is an essential skill that every member of an agile team must possess. It is a crucial aspect of building reliable and secure applications.

Specialist Skill Paths Overview

Students choose one Specialist Skill Path Module for their final project on the course. These Skill Paths are designed to offer valuable expertise in highly sought-after tech fields. By showcasing your newfound knowledge in your portfolio, you can kickstart and boost your career growth, giving you a competitive edge in the job market.

- Code Institute is the **only coding bootcamp to offer a choice of Specialist Skill Paths**.
- Prior to submitting your fourth project, you will be presented with the exciting opportunity to select one of the three available Specialised Skill Paths.

Which special skill is for you?

e-commerce

This field is experiencing rapid growth as businesses strive to enhance their online presence and expand their e-Commerce capabilities. Companies such as Amazon are actively recruiting coders with expertise in e-Commerce.

By selecting this option, learners will have the opportunity to develop a fully functional e-Commerce platform complete with a searchable product catalog, shopping basket, and secure payment facilities.

- Implement advanced search and filter features to enhance user experience.
- Seamlessly integrate a secure payment system.
- Utilise industry-leading platforms such as Stripe, Amazon Web Services, and Heroku to optimise performance and functionality.

Advanced Front-End

React is a game-changing framework that empowers coders to create unforgettable user experiences. Companies like Facebook and Instagram are big fans of React because it allows for the swift development of easily manageable apps that can quickly be launched to market.

By selecting this option, you will gain expertise in front-end development frameworks, construct complex front-end environments, and integrate React with the Django Rest framework to build robust applications.

- Learn to build a complex front-end environment like a content management site.
- Learn how to combine react with Django Rest framework to build functionally rich applications.

Predictive Analytics & AI

This module provides the foundation, introducing you to the AI landscape and helps you understand the basics of AI, Machine Learning (ML), Data Analysis, and Data Science. Graduates will have a strong grasp of what AI is and its potential and graduates will be suited for ML-focused and AI project management and strategy roles.

You will:

- Delve into Machine Learning terminologies, data types, common algorithms, and how to select them.
- Define ML business cases, data culture, and frameworks like CRISP.
- Create intelligent systems using machine learning.
- Deliver real AI projects. You will have hands-on experience with Computer Vision and Customer Behavior analysis, making them valuable assets for roles involving AI system development and deployment.

FAQ

Am I too old to start a new career?

Code Institute has trained people of every age and has helped people in their 60s change careers to software development. Employers are more interested in your skills than your age.

I am a total beginner; can I do this course?

There is no prior experience in coding or technology required. The course is designed for those who are complete beginners as well as those who are building their skills. English is required.

When do I choose my Specialist Skill option?

There is no prior experience in coding or technology required. The course is designed for those who are complete beginners as well as those who are building their skills. English is required.

Can I work and study at the same time?

Yes. This programme is very flexible, and the majority of our students work full-time while doing the programme. While the course must be completed within 52 weeks, students must spend 12-15 hours per week on coursework and have 24/7 access to the LMS.

What is “university credit rating”?

This means that a university has validated our programme and credit-rated it on a qualifications framework. Our Diploma is credit-rated by the University of West of Scotland at level 8 on the Scottish Credit and Qualifications Framework, which is equivalent to level 5 on the European Qualifications Framework. When you partake in and complete this programme, you are a student and graduate of Code Institute and not a student or graduate of the University of the West of Scotland.

Is the programme in English only?

Yes. This programme is taught completely in English. IELTS level 6.0 is the minimum level required if English is not your first language.

What are mentors?

Learners are assigned a personal mentor who provides one-on-one support and guidance on their projects. Our mentors are experienced professionals working in the tech sector. They are not employed directly by Code Institute.

How up-to-date is the course?

Learners are assigned a personal mentor who provides one-on-one support and guidance on their projects. Our mentors are experienced professionals working in the tech sector. They are not employed directly by Code Institute.

Will my skills appeal to employers in an AI-driven future?

Absolutely. At Code Institute, we ensure that your new skills align with the demands of an AI-driven future. Learning languages like Python, a linchpin in AI development, will not only make you highly attractive to employers but also position you as a valuable asset in a workforce increasingly focused on AI technologies. The practical skills you acquire will set you apart in a competitive job market where adaptability and expertise in emerging technologies are highly sought after. Your Code Institute education is designed to make you not just job-ready but highly desirable to employers shaping the future of tech.
